WHERE ACTIONS MEET WORDS.

We listen to Mother Nature, and feel obliged to align our company with the environment. We invite you to follow our example!

- Our raw timber is almost exclusively derived from European, sustainable forests.
- We are the first wood flooring manufacturer to have ceased using tropical hardwood timber for a number of years.
- Support for Greenpeace forest projects. By purchasing a Weitzer Parkett product, you are contributing to saving the last remaining virgin forests in Romania.
- Energy is a valuable resource. Our internal biomass power plant, photovoltaic systems and hydroelectric power plant allow us to produce not only environmentally friendly district heating but also eco-power. The energy produced in this sustainable manner provides power not only to Weitzer Parkett but also to more than half of the city of Weiz. This corresponds to a capacity of more than 2000 households.
- We significantly contribute to a positive eco balance by means of our overall value-added routes of chain: resources from nearby locations, short transport-routes, production in Austria, renewable energy and much more.
- **We are a step ahead: Weitzer Parkett is the first and only manufacturer in the market to offer an overall solution for wood flooring and adhesive that is free from plasticizers.**

WE LISTEN TO MOTHER NATURE

OUR ENVIRONMENTAL RESPONSIBILITY.

"Healthy, flourishing forests play a key role in the global climate, and consequently for life as a whole. Accepting responsibility for the environment is a major concern for us. That's why, as personal sponsors, we support the **GREENPEACE** forest campaign in Romania for the preservation of the last remaining virgin forests in Europe."
